

invites you to the monthly

# Commercial Roofing & Industry Trends and Updates

## Lunch and Learn Seminar

Attend this nationally recognized course on commercial roofing, metal retrofitting, and this year's exciting rebate programs on renewable energy.

### Topics Covered

- Metal roofing
- Design pressures
- Warranties
- Maintenance
- Retrofits
- Miami Dade County Building Department update
- Online permitting
- Fire and wind speed ratings
- Commercial and industrial solar energy

### Featured Topics

#### Solar Energy - Commercial and Industrial

Learn about the most up to date information regarding solar energy in the commercial and industrial market segments, and this year's renewable energy rebate programs, available October 16th.

#### Retrofit Using Metal

Examine the different ways metal can be used to recover an existing building, including how to consider a roof or all retrofit, along with its environmental benefits.

*\* Course is part of the RCI Metal Roofing Course and qualifies as part of RCI continuing education credits*

#### New Building Codes and Guidelines

Boris Sursky reviews the most up to date information for permitting and roofing guidelines in South Florida, including the top five mistakes.
